

Financial Planning Report For **GOKUL SHARMA**

07th February 2023

Your Scorecard

We know that you are committed to improving your money management skills and strengthening your financial health. However, before you make any decisions, it's a good idea to analyse where you stand currently and get an idea about your strengths and weaknesses. You can learn this through financial ratios. We have evaluated your performance with the help of 5 such ratios and scored you on a scale of 1 to 100. Once you know where you stand you can chart your next steps accordingly.

Saving Ratio

Savings / Total Income = ₹72.34 Lac / ₹1.36 Cr
= 53%

Your Ideal Saving Should Be 40% Of Your Income

With increasing inflation and a longer lifespan, it is incredibly important for you to be a smart saver! We are not saying that you shouldn't enjoy your life, but remember that the more you save, the more you can grow your wealth. Currently, you are saving over 51% of your income.

Expense Ratio

Expense / Total Income = ₹64.06 Lac / ₹1.36 Cr
= 47%

Your Ideal Expense Should Be 60% Of Your Income

In addition to maximising your income, you must also focus on limiting your expenses for smart money management. It is wise to keep track of how much you are spending and what you are spending on. You are currently spending around 41-50% of your income.

Networth Ratio

Total Assets-Total Liabilities = ₹7.16 Cr-₹85 Lac
= ₹6.31 Cr

Your Ideal Networth Should Be ₹6.18 Cr

Net worth is an accurate measure of your financial health. It is the amount that's leftover (remaining, surplus, extra, that you get after) when you subtract your total liabilities from your total assets.

Liquidity Ratio

Liquid Assets / Monthly Expenses = ₹15 Lac /
₹5.28 Lac = 3 mth

Your Ideal Liquid Fund Should Be Sufficient For Your 4 Months Of Expenses

This ratio indicates your ability to encash liquid assets to meet household expenses, pay rent, EMIs and education fees when faced with an unpleasant situation such as a medical emergency, job loss, etc. At present, you only have 50% of the liquid assets that you are ideally supposed to have. This means that in an emergency, you can manage essential expenses for only 2 months.

Solvency Ratio

NetWorth/Total Assets = ₹6.31 Cr/₹7.16 Cr =
88%

Your Ideal Solvency Ratio Should Not Be Less Than 50%

Your solvency ratio indicates your ability to repay existing debts using your existing assets. Being solvent is key to achieving long-term financial success. Currently, your score is very good, which indicates you are adept at balancing your assets and liabilities!

Overall Score

Your Scorecard is 93 out of 100 which is Excellent.

Congratulations! Your score is proof that you're a pro at managing your cash flow, assets and liabilities. While this score is based on your savings ratio, expense ratio, net worth, liquidity ratio and solvency ratio, take a look at how you have fared in these areas individually to understand where you can improve.

- Excellent
- Very Good
- Good
- Average
- Not Good

Fintoo Recommends

Saving Ratio

- *Your current saving ratio is 53% of your total income. Your ideal saving ratio is 40%. As you are saving more than the basic requirement, you can either continue to save more or invest the surplus for your future goals.*

Expense Ratio

- *Your expense ratio is 47% of your total income. The ideal expense ratio is 60%. As your expenses are lesser than the base limit, we recommend you to maintain your lower expense ratio in the future too. If you wish, you can invest the surplus amount for your future goals.*

Net Worth Ratio

- *As your current net worth is more than the base limit (baseline, ideal requirement) we recommend you to maintain your current net worth in the future too. As your net worth score is excellent, it means that you are building your assets through disciplined savings and smart investments.*

Liquidity Ratio

- *At present, you only have 50% of the liquid assets that you are ideally supposed to have. This means that in an emergency, you can manage essential expenses for only 2 months. Therefore, we recommend that you must build your liquid assets to accommodate emergency expenses. If you are two people earning in your family, you must maintain an emergency corpus worth at least 4 months of your expenses.*

Solvency Ratio

- *Way to go! The amount of your liabilities is 12% which is fairly lower than the amount of your assets. We are happy that you are maintaining a healthy solvency ratio and we recommend you keep maintaining it to achieve a financially stable future. However, we would also recommend you to go a step further and reduce your liabilities even more to achieve an excellent solvency ratio.*

Net Worth Analysis

Simply put, net worth is a picture of your financial worth. It is viewed in your net worth statement, and is the amount that’s left over when you subtract your total liabilities from your total assets. Knowing your net worth is important because it makes you aware of where you stand currently. Accordingly, you can determine the steps you need to take to reach your goal and the time it will take you to do so. The table below will give you more information on this aspect.

Net Worth			
Category	Gross Assets(₹) (A)	Gross Liabilities(₹) (B)	Total Networkth(₹) (A-B) 6,30,62,157
Debt	65,67,816		
Equity	92,94,341		
Gold	12,00,000		
Gold	50,00,000		
Liquid	15,00,000		
Real Estate	4,40,00,000		
Insurance	40,00,000		
Liability		85,00,000	
Total	7,15,62,157	85,00,000	

Net worth is an accurate measure of your financial health. It is the amount that’s leftover when you subtract your total liabilities from your total assets.

Your current net worth is ₹6,30,62,157 Your ideal net worth is ₹6,18,12,000 .

As your current net worth is more than the base limit (baseline, ideal requirement) we recommend you to maintain your current net worth in the future too. As your net worth score is excellent, it means that you are building your assets through disciplined savings and smart investments and have tackled your liabilities wisely.

Ideal Net Worth: ₹6,18,12,000

Current Net Worth: ₹6,30,62,157

Fintoo Recommends

Asset Allocation:

Ideal Asset Allocation

To encourage sound financial decision making, our experts have created a table that details ideal asset allocation for you. This will help you understand the asset classes that you should focus on for good results and the instruments that you should pick from the thousands that are available. Ideal asset allocation includes rebalancing your asset portfolio as per your risk appetite, as well as upcoming goals that you want to achieve in the next 2 years. It also accounts for contingencies.

Particular	Percentage (%)	Amount (₹)
Equity	52.9	1,93,39,186
Debt	9.6	35,16,215
Real Estate	19.2	70,32,431
Liquid	3.8	14,00,000
Alternate	9.6	35,16,215
Gold MF/ETF/SGB	4.8	17,58,107
Total Asset	100	3,65,62,157

Current Asset Allocation

‘Don’t put all your eggs in one basket’ aptly describes why asset allocation is important. It simply means that your portfolio must feature a mix of equity, debt, cash, alternate assets, etc. to help you minimize your exposure to risk and maximise returns. So, take a look at your current asset allocation in the table below.

Particular	Percentage (%)	Amount (₹)	Variance (₹)
Equity	25.4	92,94,341	1,00,44,845
Debt	18	65,67,816	(30,51,600)
Real Estate	49.2	1,80,00,000	(1,09,67,568)
Liquid	4.1	15,00,000	(1,00,000)
Alternate	0	0	35,16,216
Gold MF/ETF/SGB	3.3	12,00,000	5,58,108
Total Asset	100	3,65,62,157	

Notes

- It's important to note that self-occupied property and physical gold are not taken into account when carrying out this exercise.
- The goal value of all the goals under two years and emergency corpus is considered in the liquid fund while calculating ideal asset allocation.
- If your goal value is greater than your total asset value, we will not consider the goal in the ideal asset class liquid fund. Eg. If the total asset value is Rs.80,00,000/- and your goal value is Rs.2,00,00,000/- within two years, we will not consider the goal value as asset class liquid fund
- $\text{Idea Asset Allocation} - \text{Existing Asset Allocation} =$ (If the value is negative - sell if the value is positive - buy)

If the actual percentage of your existing asset class allocation is more than the ideal asset class allocation percentage, then you need to sell the extra (percentage, asset class, additional allocations, portion, amount) to maintain the ideal asset class allocation percentage.

Eg. If equity asset class allocation is 47.3%, then you need to sell the extra 14.3% to maintain the ideal asset allocation of 33%.

Goal Analysis

“When it is obvious that the goals cannot be reached, don’t adjust the goals, adjust the action steps.”

- Confucious

 Goal Analysis

With the help of Fintoo's financial planners you can set and prioritise your financial goals. These may range from providing for your children’s education and supporting your elderly parents to repaying debt that will help you improve your lifestyle. It could also include building wealth for retirement or saving for your children’s weddings. Once you define your goals our experts can determine the best strategy for you. This will allow you to achieve them in a timely manner through successful investing.

Goal Name	Category	Critical / Non Critical	Priority	Frequency	Goal Year	Present Value (₹)	Future Value (₹)	Inflation (%)
Foreign Study	Education	Critical	Very High	One-time	2025	40,00,000	50,65,505	10
Doctor	Education	Critical	Very High	Recurring - Yearly	2024 - 2028	50,00,000	4,01,39,127	10
Daughter Marriage	Marriage	Critical	High	One-time	2032	25,00,000	49,12,026	7
Son Marriage	Marriage	Non-Critical	Medium	One-time	2029	15,00,000	24,19,092	7
International Vacation	Vacation	Non-Critical	Medium	Recurring - Once In 2 Year	2023 - 2040	5,00,000	84,46,868	7
BMW- X1	Vehicle	Non-Critical	Low	One-time	2027	60,00,000	74,95,561	5
Total Goal Amount						1.95 Cr	6.85 Cr	

Goal Asset Mapping Analysis

In the table below you can view the goal amount, which is the amount of finance that is required to achieve your goal after taking into consideration the probable rate of inflation. We have also linked some of your assets and investments to this goal that will help you achieve it. This exercise is known as asset mapping for your goals. The most important takeaway of this table is that you can see whether your goal will be fully or partially achieved post asset mapping.

Daughter Marriage
Gokul Sharma

Present Value ₹ 25,00,000	Goal Future Value ₹ 49,12,026	Goal Year 01-09-2032	Inflation 7 %
------------------------------	----------------------------------	-------------------------	------------------

Linked Assets by You

The below table highlights the assets manually linked by you with your desired financial goals. We have also added a note mentioning the assumed Rate Of Return (ROR) for the asset classes linked by you to get the future value.

Linked Assets	Linked Assets Future Value (₹)
Canara Rob Emerg Equities Fund-Reg(G) Equity Mutual Funds Priya Sharma	43,82,593
CDSL - NSE Equity Shares Priya Sharma	32,50,923
Gross Total	76,33,516
Surplus / (Shortfall)	27,21,490

Goal Asset Mapping Graph

Notes

 *The Rate Of Return (ROR) for the Equity Asset Class Eg. Shares, Equity Mutual Funds, PMS, ESOPs etc. linked to achieve your goals is assumed to be **12.0%** per annum, as per the market standards or as manually edited by you.*

Contingency & Risk Management Planning

“Life Insurance is the only tool that makes pennies and guarantees dollars.”
- Ben Feldman

Emergency Corpus

Emergencies may arise due to many reasons like health issues, job loss, disability, unexpected expenses, etc. These emergencies may lead to a reduction or stoppage of one’s income. But, regular household expenses don’t stop. So, it is important to plan out an emergency corpus for such situations.

Emergency Corpus		
Type	Amount (₹)	Emergency Corpus(₹) (A-B) Surplus 1,00,000
Monthly Expenses	3,50,000	
Emergency corpus Required (Monthly Expenses * 6) (A)	14,00,000	
Liquid Assets Available (B)	15,00,000	

Fintoo Recommends

As per our calculations, the ideal amount for your emergency corpus is ₹14,00,000. Currently, the amount of your available liquid assets is ₹15,00,000, which is more than the ideal amount. Therefore, we recommend you to use the surplus amount for additional investment purposes.

Life Insurance

As an earning member of your family, it’s essential that you buy life insurance. It provides you with a layer of protection against situations that are out of your control and in turn, offers peace of mind. In other words, in the event of your demise, the amount that your family will receive will help them to meet their financial needs. Purchasing appropriate life insurance will help maintain their standard of living and ensure that they are able to repay outstanding debts, if any. Moreover, you will be able to provide for your family’s future needs, be it your children’s education, their weddings, or your spouse’s retirement.

Particular	Annual Amount (In ₹)
Critical Expenses	
Regular expenses till lifetime	11,47,95,817
Regular expenses till limited term (Child schooling expenses & Life insurance premium for spouse)	85,32,822
Total Critical Expenses (A)	12,33,28,639
Outstanding Debt	
Andheri	50,00,000
Kandivali West	30,00,000
Car Loan	5,00,000
Total Liabilites (B)	85,00,000
Goal Present Value	
Foreign Study	41,86,059
Doctor	2,66,98,194
Total Goal Present Value (C)	3,08,84,253
Total Ideal Insurance (1) (A + B + C)	16,27,12,892

Policy Details

In the table below you’ll find details of the existing life insurance policies that you have purchased.

Policy Name	Sum Assured (₹)
Max life Term Plan	2,00,00,000
Aditya Birla Sun Life - Foresight SP Fund - I	30,00,000
Total Existing Insurance (2)	2,30,00,000

- Ideal Insurance cover required less existing insurance that you already have will give the additional life insurance cover that you need to buy.

Ideal Insurance cover (1)	16,27,12,892
Existing Insurance cover (2)	2,30,00,000
Additional Insurance Required (1-2)	13,97,12,892

Medical Insurance Coverage

Today, when stress and lifestyle-related health issues are rapidly increasing, a large number of young and middle-aged individuals are being diagnosed with diseases that were once considered to be rare and acquired only at old ages. While health is deteriorating and health care is becoming more and more expensive, buying a health insurance policy for yourself and your family has become extremely important.

Hospitalisation can burn a hole in your pocket and derail your finances. It will become even more difficult if the earning member needs to get hospitalised. All this can be avoided by just paying a small annual premium which would lessen your stress in case of medical emergencies. A good health insurance policy would usually cover expenses made towards doctor consultation fees, costs towards medical tests, ambulance charges, hospitalization costs and even post-hospitalization recovery costs to a certain extent.

Parameters Considered To Calculate Your Ideal Medical Insurance Cover:

- 1. **Location**
- 2. **Lifestyle**
- 3. **Current Health Status**
- 4. **Affordability**

Coverage	Sum Assured (₹)
Ideal Health Coverage For Family (A)	9,75,000
Existing Personal Cover (B)	15,00,000
Surplus (A-B)	5,25,000

Cash Flow Analysis

“Beware of little expenses; a small leak will sink a great ship.”
- Benjamin Franklin

 Net Surplus / Shortfall

Once you deduct all your expenses from your income, you will be left with an amount that is nothing but your savings. Further, when you subtract the sum that you have committed towards existing investments, such as SIPs or PPF, from your savings, you will be left with a sum which is your net surplus. However, if you are spending more than your total income, you will be left with a net shortfall. The table below calculates your net surplus/shortfall for every year until your retirement. It also takes into account the year-on-year growth in your net surplus and investments.

AGE PROFILING		CASH INFLOW /OUTFLOW		GROSS INVESTABLE SURPLUS / SHORTFALL	EXISTING INVESTMENT COMMITMENT	SURPLUS/SHORTFALL
Year	Age	Cash Inflow (₹) (A)	Cash Outflow (₹)(B)	Gross Investable Surplus /Shortfall (₹) (C) = (A)-(B)	Gross Investment (₹) (D)	Net Investable Surplus (₹)(C)-(D)
2023	42	1,48,80,000	65,84,507	82,95,493	12,76,000	70,19,493
2024	43	1,61,64,000	75,51,498	86,12,502	12,76,000	73,36,502
2025	44	1,75,62,600	70,08,946	1,05,53,654	12,76,000	92,77,654
2026	45	1,90,86,282	73,81,122	1,17,05,159	12,76,000	1,04,29,159
2027	46	2,07,46,504	77,78,571	1,29,67,932	9,64,000	1,20,03,932
2028	47	2,25,55,793	82,03,033	1,43,52,760	9,64,000	1,33,88,760
2029	48	2,45,27,845	86,56,364	1,58,71,481	9,64,000	1,49,07,481
2030	49	2,66,77,637	87,80,553	1,78,97,084	9,64,000	1,69,33,084
2031	50	2,90,21,545	92,97,723	1,97,23,822	9,64,000	1,87,59,822
2032	51	3,15,77,482	91,13,815	2,24,63,666	9,64,000	2,14,99,666
2033	52	3,43,65,038	97,03,925	2,46,61,113	9,64,000	2,36,97,113
2034	53	3,74,05,644	1,03,34,317	2,70,71,326	9,64,000	2,61,07,326
2035	54	4,07,22,743	1,10,07,772	2,97,14,971	9,64,000	2,87,50,971
2036	55	4,43,41,985	1,17,27,259	3,26,14,726	9,64,000	3,16,50,726
2037	56	4,82,91,434	1,24,95,958	3,57,95,476	9,64,000	3,48,31,476
2038	57	5,26,01,800	1,29,99,582	3,96,02,218	9,64,000	3,86,38,218
2039	58	5,73,06,690	1,38,77,136	4,34,29,554	9,64,000	4,24,65,554
2040	59	1,27,72,492	49,38,276	78,34,216	4,25,000	74,09,216

Retirement Corpus

This is that amount you’ll need to live comfortably all through your non-earning, retirement years. To arrive at your retirement corpus our experts determine the future cost of all your expenses, while also taking into account the rate of inflation.

Particulars	Amount (₹)
Corpus required for post retirement expenses (₹)	19,39,79,241
Total Corpus Required (₹)	19,39,79,241
Linkages Asset	
PPF	65,59,307
EPF	3,62,67,785
Total Corpus Created	4,28,27,092
Shortfall (Corpus Required - Corpus Created)	(15,11,52,149)

Total Corpus Required - Total Corpus Created = Shortfall/Surplus

On determining the retirement corpus you require, Fintoo totals your existing assets as well as investments such as EPF and PPF that have been previously earmarked for retirement. This indicates whether the value of your assets and investments is equal to your retirement corpus, or if there’s a surplus or shortfall.

 Post Retirement Cashflow

Controlling your financial affairs requires a budget, that is a cash flow statement. Budgeting and tracking your expenses gives you a strong sense of where your money goes and can help you reach your financial goal like retirement in this case. Below table explains how your cash flow will look like from year to year basis if you are able to achieve your required corpus.

Year	Age	Opening Balance (₹) (A)	Yearly Regular Expenses (Lifetime) (₹) (B)	Limited Term/One-Time Expenses (₹) (C)	Annual Regular Income (₹) (D)	Cash Withdraw From Corpous (₹) (F) = (D)-(B+C)	Closing Balance (₹)=(F)+(A)
2040	60	19,39,79,241	87,34,896	5,81,571	14,67,675	(78,48,792)	18,61,30,449
2041	61	19,61,33,438	1,22,39,256	8,46,891	20,28,216	(1,10,57,931)	18,50,75,507
2042	62	19,80,30,792	1,27,28,826	8,79,487	21,29,627	(1,14,78,686)	18,65,52,106
2043	63	19,96,10,753	1,32,37,979	9,13,386	22,36,108	(1,19,15,257)	18,76,95,496
2044	64	20,08,34,181	1,37,67,498	9,48,641	23,47,913	(1,23,68,226)	18,84,65,955
2045	65	20,16,58,572	1,43,18,198	9,85,307	24,65,309	(1,28,38,196)	18,88,20,376
2046	66	20,20,37,802	1,48,90,926	10,23,439	25,88,574	(1,33,25,791)	18,87,12,011
2047	67	20,19,21,852	1,54,86,563	10,63,097	27,18,003	(1,38,31,657)	18,80,90,195
2048	68	20,12,56,509	1,61,06,026	11,04,341	28,53,903	(1,43,56,464)	18,69,00,045
2049	69	19,99,83,048	1,67,50,267	11,47,235	29,96,598	(1,49,00,904)	18,50,82,144
2050	70	19,80,37,894	1,74,20,278	11,91,844	31,46,428	(1,54,65,694)	18,25,72,200
2051	71	19,53,52,254	1,81,17,089	12,38,238	33,03,749	(1,60,51,578)	17,93,00,676
2052	72	19,18,51,723	1,88,41,773	12,86,488	34,68,936	(1,66,59,325)	17,51,92,398
2053	73	18,74,55,866	1,95,95,444	13,36,668	36,42,383	(1,72,89,729)	17,01,66,137
2054	74	18,20,77,767	2,03,79,262	13,88,855	38,24,502	(1,79,43,615)	16,41,34,152
